17th March 2026

Dear Parents and Carers,

I am writing to inform you that we have had two confirmed cases of parainfluenza within Dosbarth Enfys.

Parainfluenza is a common respiratory virus that can cause symptoms such as a runny nose, cough, sore throat, and fever. In some children, it may also lead to croup, which is characterised by a distinctive barking cough and hoarseness. While many cases are mild, we recognise that children with severe and complex medical needs may be more vulnerable to complications, and we therefore want to keep you fully informed.

We are continuing to follow appropriate hygiene measures within the classroom, including enhanced cleaning regimes, regular handwashing and cleaning of frequently touched surfaces, to help reduce the spread of infection.

We kindly ask that you:

- Monitor your child closely for any symptoms such as cough, fever, changes in breathing, or general wellbeing
- Keep your child at home if they are unwell or showing any signs of infection
- Inform the school promptly if your child is diagnosed with parainfluenza or develops similar symptoms
- Share any specific medical advice or care adjustments from your child's healthcare team that we should be aware of

If your child becomes unwell or you are concerned about their symptoms, please seek advice from your GP, contact NHS 111 Wales, or follow guidance provided by your child's specialist medical team.

If you would like to discuss your child's individual needs or any additional precautions, please do not hesitate to contact us.

Yours sincerely,

Mr. Aron Bradley
Executive Headteacher
